1.4. Shareholding structure of the Group as at 30 June 2019

1.5. Personnel

As of 30 June 2019, the average payroll staff of the Group was 1,265 workers and employees (30 June 2018: 1,288).

2. Current period result of the Group

For the period 01 January 2019 – 30 June 2019, the Group has reported an operating profit of BGN **17,710** thousand (for the period 01 January 2018 – 30 June 2018 - BGN **14,810** thousand) and net profit of BGN **15,698** thousand (01 January 2018 - 30 June 2018: BGN 12,929 thousand). Despite the increase in impairment of biological assets (parent flocks) by almost 1,820 thousand, the profit scored a growth by 21.99 %. This growth in impairment of biological assets is a result of the increased capacity of the parent folks, which will contribute further to the results of the company in the following quarters.

REVENUE

Sales revenue reported by the Group for the reporting period amount to BGN 39,883 thousand, including:

Sales revenue	01-06/2019 BGN'000	01-06/2018 BGN'000	Change %	Relative share 2019 %
Revenue from sale of finished products	61 936	54 369	14%	72%

Revenue from sale of services	393	377	4%	-
Total sales revenue	86 475	64 402	34%	100%

Revenue from sale of finished products for the period ending 30 June 2019 grew by BGN **7.5** million or by 14% compared to the same period of 2018. This development is due to the stabilisation of prices on international markets and the sales of significant quantities abroad. External factors also contributed to achieving better results. It is expected that this trend will continue in the future as well, and the Group will succeed in taking advantage of better opportunities and sustain them in the long term.

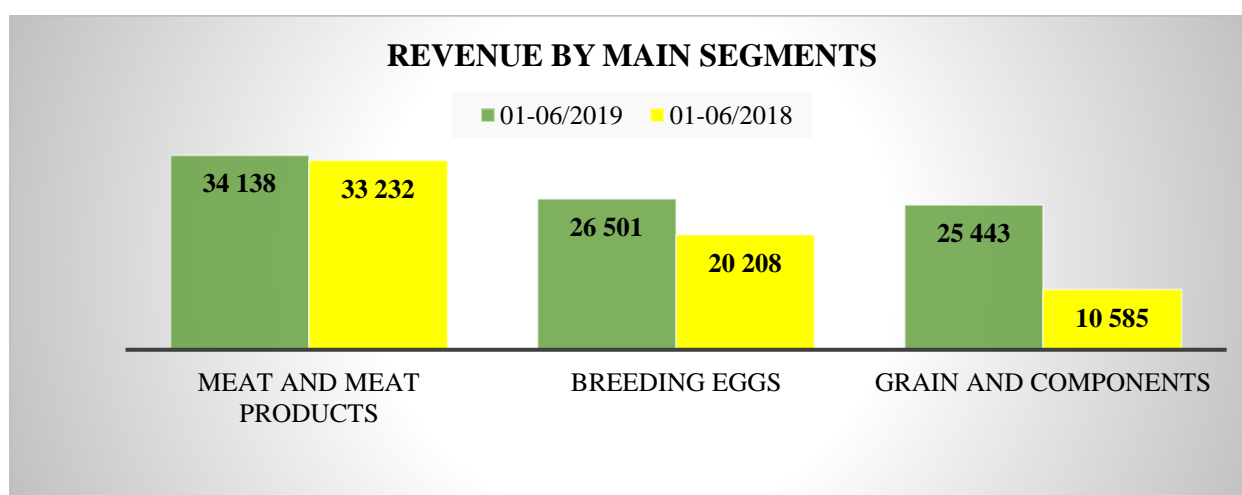

Revenue from sale of goods for the period ending 30 June 2019 grew by BGN **14.4** million or by 150% compared to the same period of 2018. The Group managed to contract good deals for sales of the products of the major Grains and Components segment. It is expected that this segment will develop positively in the current year.

Revenue from sale of services for the period ending 30 June 2019 grew by BGN 16 thousand or by 4% compared to the same period of 2018.

The results of the Meat and Meat Products segment showed a 2.73% growth. The new product of the Group – the slow-growing "Yellow Chicken" brand – demonstrates an extremely good trend with regard to sales and price range.

Thanks to increased interest in this period, the production volumes were expanded. We have succeeded in introducing the product into major store chains, demand continues to grow, and the product is very well accepted by consumers.

The other brand of the Group, “I eat”, reported a growth in sales by almost 13.2% compared to the first quarter of 2018.

It is expected that the market conjuncture will not change in the coming months and the Group will achieve good results. Forecasts are for product price increases, mainly due to more expensive raw materials, rising domestic consumption and inflation. The main objective of Gradus AD is to maintain good margins and increase sales.

Sales revenue in the Breeding Eggs segment (breeding eggs and one-day-old chickens) grew significantly by 31%. This development is due to the stabilisation of prices on international markets and the sales of significant quantities abroad. Domestic sales also reported a significant increase. During the reporting period, the Group achieved a 40.12% growth in sales of breeding eggs to third countries compared to the same period of 2018. During the period January – June 2019, the Group achieved a 10.76% growth in sales of one-day-old chickens on the domestic market or by BGN 3.1 million more compared to the same period of 2018.

During the reporting period of 2019, the Group reported a decline in sales of one-day-old chickens in Europe by 16.13% or by BGN 1.4 million less compared to the same period of 2018, mainly due to the increase in sales of breeding eggs. During this period, considering the growth in prices on the European market, the Group focused mainly on the sale of breeding eggs.

For the first half of the year, the Group achieved sales growth in the Grains and Components segment. It is mainly driven by the poor performance in 2018 and thus, the result achieved in this quarter is a return to normal levels. The focus of the Group is not directed towards this business segment. If good opportunities come along, additional deals will be realized in this business segment.

The Group is in the process of optimizing and changing its way of work to reduce costs and increase revenue.

For the period January – June 2019 other reported operating income amounts to BGN 12,883 thousand and consists of:

Other operating income	01-06/2019 BGN'000	01-06/2018 BGN'000	Change %	Relative share 2019 %

--------------	---------------	---------------	-----	------

During the reporting period January – June 2019, *operating costs* scored a growth by BGN 20 million or by 32% compared to the same period of 2018. The change is mainly due to the increase in sales and hence, in the carrying amount of goods sold by the Group and costs of hired services, personnel and depreciation/amortisation.

Costs of raw materials and materials grew by BGN 4.3 million or by 12% in the first half year of 2019 compared to the same period of 2018, primarily due to the enhanced capacity.

2.1. Main risks faced by the Group

The risk management policy of the Group is directed towards identifying and analysing the risks to which the Group is exposed in order to set limits of risk appetite. Based on the analysis of these risks, the Group develops and implements appropriate controls to address these risks. This policy, as well as the risk management controls introduced are subject to periodic reviews in order to reflect any changes in the external and internal conditions in which the subsidiaries operate.

Credit risk

Credit risk arises mainly from receivables from customers. The exposure to credit risk is the result of the individual characteristics of each individual client.

The Group manages credit risk primarily by placing credit limits on each client individually, depending on the sales volume and the client's credit history, as well as by exercising constant control over delayed payments.

Currency risk

Sometimes, the Group companies undertake transactions denominated in foreign currencies. The Group is exposed to currency risk relating to possible fluctuations in exchange rates of foreign currencies. Currently, such risk originates from fluctuations in the USD exchange rate upon trading in agricultural produce.

Liquidity risk

Liquidity risk is the risk that the Group companies will have difficulty in fulfilling their obligations related to financial liabilities. The liquidity management approach aims at ensuring, as far as possible, that there will always be sufficient liquidity to meet its obligations, both under normal and stressful conditions, and without incurring unacceptable losses or harming the reputation of the Group. For the purpose, the subsidiaries maintain credit lines and use short-term borrowings from banks.

Market risk

Market risk is the risk that in case of changes in market prices, such as foreign exchange rates, interest rates or prices of equity instruments, the companies' income or the value of their investments may be affected. The goods' prices are monitored by the Group's management. Sales are managed locally using competitive market prices. The main factors determining price changes are changes in competitors' prices as well as changes in the cost of products.

2.2. Key ratios analysis

In order to achieve greater efficiency and control over the Group companies' results, management monitors certain key performance indicators related to business activities. These indicators are mainly focused on the amount of profit, debt level and effectiveness.

- **Gross Profit Margin (Gross profit from operations / Sales)**

	1-6/2019	1-6/2018
Pre-tax profit	17 710	14 531
Income	86 475	64 402
Gross profit margin	20.48%	22.56%

- **EBITDA margin (EBITDA-Earnings before interest, taxes, depreciation and amortisation /Sales)**

	1-6/2019	1-6/2018
EBITDA (Earnings before interest, taxes, depreciation and amortisation)	20 792	17 544
Income	86 475	64 402
EBITDA margin	24.04%	27.24%

- **Debt to Assets Ratio (Total Liabilities / Total Assets).** Through this indicator, management monitors how much of the assets have been financed by debt in one form or another.

	1-6/2019	1-6/2018
Total liabilities	63 563	39 100
Total assets	379 463	363 663
Debt to Assets Ratio	0.17	0.11

2.3. Prospective future development of the Group

The Group plans its development both in the short and long-term.

The short-term plans include: continued increase in the capacity of Breeding Eggs and Meat and Meat Products segments.

In implementation of its investment programme announced in the Prospectus for public offering of shares, Gradus AD, through its subsidiary, Gradus 98 AD, has increased and continues to increase its capacity in the Breeding Eggs segment. There are prerequisites for a significant increase in sales in this segment and opportunities to attract new long-term customers. Investments in this direction will therefore continue. Capacity growth is also envisaged in the Meat and Meat Products segment mainly targeting exports. New products will be launched under the "Ground", "I Eat" and "Le Poulet" brands. The broiler breeding area in the subsidiary Lora – 2004 EOOD was expanded. Investments in this direction also continue.

Due to the higher demand for one-day old chickens, the Group considers that the capacity of this direction should be increased. A long-term objective of the Group is to increase the market penetration of one-day old chickens in the neighbouring countries Greece and Romania, as the current capacity is not sufficient to achieve a significant increase in sales in this segment.

Additional capacity will be required to support the increase in volumes of production in the Meat and Meat Products segment.
