This uncertainty creates risks that the Group analyzes and assesses, which would also had an indirect effect on the Company's activity.

The exposure to a credit risk depends on the individual characteristics of each customer. The Company measure the credit risk of loans to related parties using internal valuations that reflect the probability of default.

Liquidity risk

Liquidity risk is the risk that the Company will have difficulties in fulfilling its obligations related to financial liabilities. The liquidity management approach of the Company aims at ensuring, as far as possible, that there will always be sufficient liquidity to meet its obligations, both under normal and stressful conditions, and without incurring unacceptable losses or harming the reputation of the Company.
