Total:	855	753	14%	100%

During the reporting period, the highest share of expenses is the cost of remuneration.

2.4. Risk factors for the activity

Unforeseen events in connection with the Covid-19 pandemic would have an indirect effect on the company's activities. The effects of the pandemic, as well as their impact, are difficult to predict, but management continues to take the necessary measures to limit them. Gradus AD has sufficient liquid resources to continue its activities in the foreseeable future. Various levels of control have been introduced to ensure the effective monitoring of these risks.

The continuing uncertainty regarding the expected economic development at the national, regional and global levels, as well as the observed inflationary processes, are a challenge in determining the Group's strategy and may affect its results. The geopolitical risk associated with the conflict in Ukraine may have a negative effect on economic processes in Bulgaria and the region, as well as in particular on supply chains in a number of sectors of the economy, and hence affect the Group's operations. This uncertainty creates risks that the Group analyzes and assesses, which would also had an indirect effect on the Company's activity.

Credit risk

Credit risk exists if a loss is generated when a counterparty to a financial instrument is not able to meet its obligations under a contractual term.

The exposure to a credit risk depends on the individual characteristics of each customer. The Company measure the credit risk of loans to related parties using internal valuations that reflect the probability of default.

Liquidity risk

Liquidity risk is the risk that the Company will have difficulties in fulfilling its obligations related to financial liabilities. The liquidity management approach of the Company aims at ensuring, as far as possible, that there will always be sufficient liquidity to meet its obligations, both under normal and stressful conditions, and without incurring unacceptable losses or harming the reputation of the Company.

The Company had no payables under financial liabilities as at 31 December 2022.

Market risk

Market risk is the risk that in case of changes in market prices, such as foreign exchange rates, interest rates or prices of equity instruments, the Company's income or the value of its investments may be affected. At present, this risk is immaterial.

Financial risk management

The overall capital management goal of the Company is to ensure its ability to continue as a going concern and to ensure adequate return to its shareholders.

During the period ending 31.12.2022 there are no changes to capital management objectives, policies or processes.

2.5. Events for Gradus AD occurred in the period January - December 2022.

On February 24, 2022, a military conflict between Ukraine and Russia arose. A number of countries subsequently imposed sanctions against certain natural and legal persons in Russia. The Russia-Ukraine conflict and related economic sanctions and other measures taken by governments around the world are expected to have a significant effect on both the local economies of individual countries and the global economy.

Gradus AD and its subsidiaries do not own investments on the territory of the parties involved in the military conflict. The Company and its subsidiaries have no commercial relationship with counterparties to which sanctions have been imposed. Gradus AD and its subsidiaries do not have suppliers of goods or services from the parties to the conflict. Sales to customers from the parties concerned are not significant for the activities of the Company and its subsidiaries and may be redirected to other markets on the same or more advantageous terms. Indirect economic effects on the activities of the Company through its subsidiaries caused by the conflict and mainly expressed in volatility of the prices of raw materials that the Group buys for the production of feed are identified.
